

VP67LCR  
(WITHOUT GRILLE)

## Sonance Visual Performance® Series

# VP67LCR Home Theater Speaker

Sonance Visual Performance® Series speakers combine elegant, modern style with outstanding audio performance. New micro flange grilles have only 0.20" of trim, giving these speakers a clean, sleek appearance that seamlessly integrates into any designed space. The grilles attach via powerful magnets, for simple, quick installation. A one-step paint process saves time compared to traditional flanged speakers.

Incorporating the same drivers as the VP67 and VP67R but in a traditional dual-woofer/single-tweeter home theater speaker format, the VP67LCR makes an ideal center-channel counterpart for any Visual Performance series left

and right channel speaker pair in small or medium-sized home theater systems. And by using the VP67LCR in all three front-channel positions (left, center and right) and other Visual Performance series speakers as surround channels, an exceptionally high-performance home theater system can be assembled.

Installation is quick and easy thanks to the RotoLock® mounting system. Exclusive FastMount® tabs hold the speaker in the mounting hole during installation, allowing the installer to let go of it to pick-up tools or other items. And the VP67LCR is designed to fit between standard 16" on-center studs (the standard stud spacing in the USA).

## Features:

- Micro flange steel grille has only 0.20" of ABS trim for a sleek, modern appearance. Powerful neodymium magnet grille attachment eases installation.
- Traditional dual woofer/single tweeter home theater speaker configuration.
- Visually and sonically matches other Sonance Visual Performance® Series speaker models.
- Dual carbon fiber cone woofers produce deep, powerful bass and provide high-output low-distortion music and film dialog.
- Fits standard 16" on-center stud construction.
- Exclusive new FastMount® tabs hold the speaker in the mounting hole during installation, allowing the installer to let go of the speaker to pick-up tools or other items.
- The Rotolock® mounting system makes installation quick and easy.
- A three position tweeter adjustment switch lets you balance the speaker's high-frequency energy to better complement the room's setup and acoustics.
- Grilles and frames can be painted together, saving installation time.

## Specifications:

### Sonance Visual Performance VP67LCR

Tweeter:	1" (25mm) Aluminum dome, Ferrofluid-cooled
Woofer:	Two 6½" (165mm) Coated carbon fiber cones with rubber surrounds and extended pole pieces
